SUMMARY

Data Analyst/ Business Analyst with 4+ years of experience across fintech, insurance, and banking. Strong expertise in SQL, Python, BI dashboards, KPI reporting, and data modeling to deliver actionable insights that improve revenue performance, operational efficiency, and risk management.

WORK EXPERIENCE

Data Analyst
Chubb Insurance — Kuala Lumpur, Malaysia | Feb 2025 – Present

- Played a key role in **insurance digital transformation initiatives**, supporting the modernization of legacy systems into **cloud-based data platforms**, improving data accessibility, scalability, and reporting reliability.
- Designed, automated, and enhanced **Power BI dashboards and operational KPI frameworks**, reducing recurring manual reporting workload by **30%** and enabling faster, data-driven decision-making across business teams.
- Identified critical **data quality gaps and inconsistencies** impacting reporting accuracy; implemented validation logic and reconciliation checks that improved data reliability by **20%**.
- Translated **medium-to-complex business requirements** into scalable analytics and reporting solutions, shortening stakeholder decision cycles by **25%** and improving alignment between business and technology teams.
- Partnered closely with **cross-functional insurance stakeholders (underwriting, claims, operations, finance)** to deliver actionable insights supporting performance monitoring, operational efficiency, and strategic initiatives.
- Built **self-service BI and reporting solutions** for senior management, eliminating **20+ hours of manual reporting per month** and increasing transparency into system performance and operational KPIs.
- **Key Tools:** SQL, Python (Pandas, NumPy), Power BI, Snowflake, Databricks, Excel

Data Scientist
Juris Technologies — Kuala Lumpur, Malaysia | Aug 2022 – Jan 2025

- Delivered end-to-end **data science and analytics solutions** for fintech and banking clients, supporting **credit risk assessment, revenue optimization, and product decision-making**.
- Improved **credit scoring model accuracy by 16%** through feature engineering, model tuning, and statistical validation, directly enhancing risk prediction performance.
- Designed, built, and optimized **data warehouses and ETL pipelines**, reducing batch job runtime by **30%.**
- Identified and resolved defects in **AI prediction systems**, improving model reliability and production stability through targeted debugging and code refactoring.
- Supported **R&D initiatives** by developing and prototyping AI use cases for potential clients, contributing to innovation efforts across finance and banking domains.
- Contributed to the development of a **Generative AI–powered analytics chatbot**, enabling natural-language business queries to be translated into SQL, reducing ad-hoc analysis turnaround time by **70%**.
- Operated within **Agile/Scrum delivery environments**, supporting sprint planning, daily stand-ups, and progress tracking, improving team execution efficiency by **80%**.
- **Key Tools:** SQL, Python (Pandas, NumPy), Scikit-learn, TensorFlow, BigQuery, AWS S3, MariaDB, Streamlit, Tableau

Data Analyst
iMoney Group (under Juris Technologies) — Kuala Lumpur, Malaysia | Aug 2022 – Jan 2025

- Delivered **end-to-end business and marketing analytics** across financial products, translating complex datasets into insights that directly supported **revenue growth, cost optimization, and operational efficiency**.
- Built and automated **executive dashboards and performance reports** for senior management, increasing revenue and management efficiency by **30% within six months**.
- Designed **Business Development performance dashboards** to track marketing spend versus incoming leads, contributing to a **20% increase in revenue** through improved spend allocation.
- Developed **marketing analytics and customer segmentation dashboards**, reducing ineffective paid advertising spend by **47%** and improving campaign targeting efficiency.
- Deployed analytics to optimize **call center and telesales operations**, increasing daily submission leads by **200** and reducing turnaround time by **27%**.

- Conducted **advanced customer segmentation and demographic analysis** for personal loan products, reallocating up to **88% of marketing spend** toward high-performing customer segments.
- **Key Tools:** SQL, Python (Pandas, NumPy), Google Looker Studio, Tableau, Excel, Google Sheets, DBeaver

Business Analyst Intern
Juris Technologies — Kuala Lumpur, Malaysia | Apr 2022 – Jul 2022

- Supported **banking process analysis and system configuration** using the Application Server framework, improving operational efficiency and reducing turnaround time by **20%**.
- Gathered and translated **business and user requirements** into clear functional documentation and **process workflow diagrams**, contributing to a **10% reduction in delivery time**.
- Facilitated and executed **User Acceptance Testing (UAT)** sessions, identifying defects and supporting resolution activities, reducing potential post-release issues by **35%**.
- **Key Tools:** SQL, JIRA, Confluence, BPMN, Lucidchart, MariaDB, Toad for Oracle, ClickUp

Digital Marketing Intern
PT. Gajah Tunggal — Jakarta, Indonesia | Mar 2018 – Apr 2018

- Supported **digital marketing campaigns and social media content creation**, as well as assisting **campaign planning and performance tracking**.

SKILLS AND CERTIFICATIONS

Skills:
Data Analytics: SQL, Python (Pandas, NumPy), Data Modeling, A/B Testing, Data Quality
BI & Visualization: Power BI, Tableau, Google Looker Studio, Excel
Data Platforms: Snowflake, Databricks, BigQuery, AWS S3, MariaDB Methods & Tools:
Agile, Scrum, JIRA, Confluence

Certifications: Google Analytics 4 Certification, Oracle Cloud Platform Enterprise Analytics Specialist, Oracle Machine Learning using Autonomous Database Specialist, Advanced Python Programming – CASUGOL, Salesforce Lightning Reports & Dashboards Specialist

EDUCATION

Bachelor of Computer Science (Hons) – Mobile Computing & Artificial Intelligence Taylor's University, Malaysia | Aug 2019 – Aug 2022
CGPA: 3.94 / 4.00
Dual Award: University of the West of England, UK

PROJECT EXPERIENCE

Stock Market Predictor Application | Python, Streamlit | May 2024 | https://t.ly/MMZuT

Tableau Student to Hero Viz Challenge – 1st Place | Tableau | Jan 2022 | https://public.tableau.com/app/profile/ann3330/viz/Covid-19FromDarknesstoLightinOurDwellings/Story

DataConnect Data Viz Competition – 3rd Place | Tableau | Jan 2022 | https://www.dataconnectconf.com/dataviz-competition
